

UNITED COUNCIL
FOR
NEUROLOGIC
SUBSPECIALTIES

**Neonatal Neurocritical Care
Examination Eligibility Criteria
May 2023**

Certification Eligibility Requirements

- Bold text indicates requirements that are part of the general eligibility requirements for all subspecialties.
- Areas highlighted in yellow are defined by the subspecialty and are open for comment until June 6, 2023.
- [Submit comments](#) and reference document area letter/numbers relating to your comment.

A. GENERAL

General eligibility criteria:

1. Applicants must be certified by an American Board of Medical Specialties (ABMS) or possess equivalent certification by the Royal College of Physicians and Surgeons of Canada (RCPSC) or the American Osteopathic Association (AOA) in Neonatology, Pediatric Neurology, or Neurodevelopmental Disabilities.
 - Applicants applying under the internationally trained faculty pathway must have a medical diploma from an institution registered in the World Directory of Medical Schools.
 - Applicants applying under the internationally trained faculty pathway must be certified in his or her primary specialty by a competent medical board. Such a board may include, a) an appropriate board of the European Union of Medical Specialties (EUMS), or b) the medical board of the applicant’s country of origin, such board to be approved by the Certification Council.
2. Applicants must hold a current, active, valid, unrestricted, and unqualified license to practice medicine in at least one jurisdiction in the United States, its territories, or Canada, and in each jurisdiction in which they practice.
 - Applicants applying under the internationally trained faculty pathway for UCNS subspecialty certification must hold a valid license to practice medicine in the United States, its territories and possessions, or Canada.

A license to practice medicine is not “current, active, valid, unrestricted and unqualified” if, in any manner to any extent whatsoever, one or more of the following applies. The license is:

- a. under probation;
- b. conditioned, i.e., the physician is required to practice under supervision or with modification, or to
- c. obtain continuing education;
- d. limited, e.g., to specific practice settings;
- e. institutional, temporary, or educational; or
- f. inactive as a result of an action taken by or a request made by a medical licensing board.

Policy on Medical Licensure

- If any license currently held by an applicant participating in the application process is restricted or qualified in any way, full details must be provided to the UCNS. The UCNS may, at its sole discretion, determine whether to investigate the license and the information provided. The UCNS reserves the right to determine if the license fulfills this policy.

- 47
- 48
- 49
- 50
- 51
- 52
- Licenses that have been revoked, suspended, surrendered, or not renewed in order to terminate or settle disciplinary proceedings do not qualify as meeting the requirements for medical licensure, and all such licenses must be reported for review and consideration. The UCNS will determine if the situation is cause to deny an applicant's certification application, deny a candidate access to an examination, or revoke a diplomate's certificate.

53 B. Pathways

54 Applicants must have completed *one of four* eligibility pathways. The pathways are:

- 55
- 56
- 57
- 58
1. UCNS-Accredited Fellowship
 2. Practice Track
 3. Academic Appointment at a UCNS-Accredited Fellowship
 4. Internationally Trained Faculty at UCNS-Accredited Training Programs

59

60 1. UCNS-Accredited Fellowship Training

61 Applicants must meet one of the following requirements:

62 A) An applicant must have successfully completed a fellowship in Neonatal Neurocritical Care that is accredited by UCNS. The fellowship must be 12 months in duration. The applicant must apply within 48 months of completing the fellowship. Verification by the appropriate fellowship program director using the Fellowship Training Verification Template Letter or a copy of the fellowship completion certificate must be provided.

63

64

65

66

67

68 B) Applicants currently in a fellowship that will not be completed prior to the application deadline may still apply. The applicant must have successfully completed the fellowship training a minimum of 25 days prior to the examination week. Confirmation from the fellowship program director stating that the applicant has successfully completed the UCNS-accredited fellowship program must be received within 20 days of the fellowship completion date.

69

70

71

72

73

74

75 2. Practice Track

76 The practice track is a process that allows physicians who initiated the subspecialty prior to the availability of accredited training programs to qualify for the examination by meeting a defined set of criteria. To apply via this pathway, applicants must fulfill the requirements of the pathway on or before the last date of the current application cycle.

77

78

79

80

81 The applicant must submit the following documentation for one of the three following areas in Neonatal Neurocritical Care. Applicants must use template letters provided by the UCNS where applicable.

- 82
- 83
- 84
- 85 a. Satisfactory completion of 12 months of formal training (non-accredited in Neonatal Neurocritical Care that has taken place after the completion of formal residency training in Neurology with special qualification in child neurology, Neurodevelopmental Disabilities, or Pediatrics with certification in Neonatal Perinatal Medicine. Training or exposure to Neonatal Neurocritical Care given to residents as part of their curriculum will not count toward the 12 months of training. The applicant must provide documentation from the appropriate program director of each institution where the training occurred or a copy of their fellowship completion certificate.
- 86
- 87
- 88
- 89
- 90
- 91
- 92
- 93
- 94

OR

- 95
96
97
98
99
- b. At least 100 hours of *AMA PRA Category 1 Credit™* specifically related to Neonatal Neurocritical Care over the 60 months prior to application. Specification of programs attended and relevance to the field of Neonatal Neurocritical Care must be provided.

100
101

OR

- 102
103
104
105
106
- c. A letter from the applicant's current department chair that states he/she has an active, full-time academic appointment in which his/her teaching responsibilities include instructing one or more of the following in Neonatal Neurocritical Care: medical students, residents, or fellows.

107
108

AND

- 109
110
111
112
113
114
- d. Documentation of a 36-month* period of time in which the applicant has spent a minimum of 25% of his/her time in the practice of Neonatal Neurocritical Care. Documentation of a 24-month period of time in which the applicant has spent a minimum of 50% of his/her time in the practice of Neonatal Neurocritical Care will also be accepted. The practice must:
- 115
116
117
118
119
120
121
122
- i. Include evaluation in the context of diagnosis and management of fetus and neonates with acute neurological problems and/or longitudinal neurodevelopmental concerns. The applicant's practice must include conditions in Sections II and III of the Neonatal Neurocritical Care Examination Content Outline.
 - ii. Have occurred in the United States, its territories, or in Canada.
 - iii. Have occurred in the 60-month interval immediately preceding application for certification but need not be continuous.

123
124
125
126
127

The application must contain letters from two physicians familiar with the applicant's practice pattern during the practice time submitted in the application. The letters must together address an entire 36-month period of time submitted. Use the [Subspecialty Practice Time Verification template](#).

128
129
130
131
132
133

* If the applicant completed unaccredited training, this may count towards the 36-month period of time. For example, if the applicant completed 12 months of unaccredited training in Neonatal Neurocritical Care, UCNS will count these 12 months towards the 36-month period of time. Documentation of an additional 24-month period of time would then be required.

- 134
135
136
137
138
139
3. Academic Appointment at a UCNS-Accredited Training Program
Faculty of a UCNS-accredited training program in Neonatal Neurocritical care must supply a letter, using the [Academic Appointment Verification template](#), from the applicant's current department chair that states he/she has an active full-time academic appointment in which his/her teaching responsibilities include instructing Neonatal Neurocritical Care fellows.

140
141

Applicants of this pathway must provide practice pattern letters using the [Subspecialty Practice Time Verification template](#). Practice time requirement will mirror the requirement

142 stated in the practice track for each subspecialty. Required criteria for the letters is found
143 within the templates.
144

145 4. Internationally Trained Faculty at UCNS-Accredited Training Programs

- 146 ○ Applicant must have an active appointment as a program director or a faculty member
147 of a UCNS-accredited training program or have evidence of a current offer of such an
148 appointment. Such an offer must be written by the chairperson of the appropriate
149 department of the academic institution and state: a) when the appointment began or
150 will begin, b) that the appointment is contingent upon the applicant sitting for, and
151 passing, the next available UCNS certification examination, and c) that retention or
152 recruitment of the applicant is considered by the institution to be essential to the
153 quality of the fellowship program.
- 154 ○ Applicant must provide documentation of meeting the practice time requirements
155 stated in the practice track pathway. The practice must:
 - 156 ■ Have occurred in the 60 months immediately preceding the applicant deadline
157 but need not be continuous.

158 The application must contain a letter from the chairperson, using the [Subspecialty](#)
159 [Practice Time Verification template](#), confirming the practice time requirement has
160 been met. The letter must address the entire practice time period being submitted.

- 161 ○ Certification is linked directly to the diplomate's appointment on the faculty of a
162 UCNS-accredited fellowship. That is, if the diplomate no longer is on the faculty of a
163 UCNS-accredited fellowship, his or her certificate automatically terminates. In effect,
164 Faculty certification status is issued jointly to the faculty member and his or her
165 employing institution, which vouches for the faculty member's competence.
166
167
